

Seminar Schedule

Chemistry 501

Spring 2014

<i>Seminar Date</i>	<i>Guest Speaker</i>	<i>Host</i>
January 16	<u>Dr. Benny Freeman</u> - University of Texas-Austin "Structure-Property Relations in Polymers for Gas Separations"	Dr. Sheng Dai Webcast
January 23	<u>Dr. Richard Hooley</u> - University of California "Biomimicry with Synthetic Receptors: Self-Assembly and Molecular Recognition"	Dr. Shawn Campagna Webcast
January 30	<u>Dr. M. G. Finn</u> - Georgia Institute of Technology "Tailored Virus-Like Particles for Biomedicine and Catalysis"	Dr. Michael Best Not Webcast
February 13	<u>Dr. Robert Rioux</u> - Pennsylvania State University "Single Molecule Investigations of Heterogeneous Catalysts: Probing Solvent Effects, Adsorbate Dynamics and Active Site Heterogeneity"	Dr. Craig Barnes Not Webcast
February 20	<u>Dr. Stuart Rowan</u> - Case Western Reserve University "Using Dynamic Chemistry to Access Stimuli-Responsive Materials"	Dr. Bin Zhao Not Webcast
March 6 Lind Lecture Speaker	<u>Dr. Graham Fleming</u> - Berkeley Research, University of California "Lessons from Nature on Solar Light Harvesting" 5pm SERF 307	Dr. Tessa Calhoun Webcast
March 13	<u>Dr. Elizabeth Papish</u> - University of Alabama "Biomimetic Denitrification, Hydrogenation, and Water Oxidation with New Hydrogen Bonding Ligands"	Dr. David Jenkins Not Webcast
April 3	<u>Dr. Wei You</u> - University of North Carolina "Rational Design of Conjugated Polymers towards Bulk Heterojunction Solar Cells of High Efficiencies: Lessons, Accomplishments, and Future"	Dr. Brian Long Not Webcast
April 10 BoV Poster Winners	<u>Tess Kirchner</u> "Highly Ordered Pillar Arrays as Platforms for Planar Chromatography" UT Chemistry Graduate Students	<u>Yundi Gan</u> "Novel Phenanthroindolizidine Alkaloids with Potent Antitumor Activity: A CoMFA study of Derivatives of DCB-3503" Dr. Michael Sepaniak & Dr. David Baker Not Webcast

Buehler 555

3:40 - 5:00pm

Refreshments, 3:20pm, Buehler 513

Seminar Chair: Dr. Georges Guiochon
