

2015  Fall

<b>September 3</b>	Host: Dr. David Baker	<b>Not Web cast</b>
<i>"The Role of a Src/FAK-Paxillin Signaling in the Regulation of VEGF-Induced Retinal Neovascularization"</i>		
<a href="#">Dr. Charles "Ryan" Yates</a> – University of Tennessee, Memphis <a href="#">details</a>		
<b>September 10</b>	Host: Dr. Janice Musfeldt	<b>Not Web cast</b>
<i>"Organic-Based Magnets: New Chemistry, Physics and Materials for this Millennium"</i>		
<a href="#">Dr. Joel Miller</a> – The University of Utah <a href="#">details</a>		
<b>September 17</b>	Host: Dr. Sharani Roy	<b>Web cast</b>
<i>"Investigation of Electron-Hole Interaction in Nanoparticles Using Explicitly Correlated Wavefunction Based Method"</i>		
<a href="#">Dr. Arindam (Ari) Chakraborty</a> – Syracuse University <a href="#">details</a>		
<b>September 24</b>	Host: Dr. Janice Musfeldt	<b>Web cast</b>
<i>"Topology of Domains and Domain Walls in Complex Materials"</i>		
<a href="#">Dr. Sang-Wook Cheong</a> – Rutgers University <a href="#">details</a>		
<b>October 1</b>	Host: Dr. Ampofo Darko	<b>Web cast</b>
<i>"A Physical Organic Chemist's Approach to Precursors for the Deposition of Inorganic Nanostructures"</i>		
<a href="#">Dr. Lisa McElwee-White</a> – University of Florida <a href="#">details</a>		
<b>October 8</b>	Host: Dr. David Baker	<b>Not Web cast</b>
<i>"Diversity and Design: New Chemical Probes for Biology and Medicine"</i>		
<a href="#">Dr. Derek Tan</a> – Memorial Sloan-Kettering Cancer Center <a href="#">details</a>		
<b>October 22</b>	Host: Dr. Sheng Dai	<b>Web cast</b>
<i>"Fundamental Understanding of Bimetallic and Acid-Base Catalysis for the Upgrading of Biomass-Derived Feedstocks"</i>		
<a href="#">Dr. Yong Wang</a> – Washington State University <a href="#">details</a>		
<b>October 29</b>	Host: Dr. Charles Feigerle	<b>Web cast</b>
<i>"Insights on DNA Repair Enzymes from Computational Simulations"</i>		
<a href="#">Dr. G. Andrés Cisneros</a> – Wayne State University <a href="#">details</a>		
<b>November 19</b>	Host: Dr. Brian Long	<b>Web cast</b>
<i>"Electronically Unsymmetrical Catalysts for the Copolymerization of Olefins with Polar Vinyl Monomers"</i>		
<a href="#">Dr. Richard Jordan</a> – University of Chicago <a href="#">details</a>		

*Chemistry 501  
Seminar Schedule*

*Buehler 555  
3:40-5pm*

*Refreshments  
3:30pm Buehler 513*

*Seminar Chair  
Dr. David Baker  
Ph: 974-1066  
[dcbaker@utk.edu](mailto:dcbaker@utk.edu)*
